How the System Works

The Technik Cabinetry system is a series of cabinetry components that can be used in various combinations to create a storage solution tailored to your needs. Cabinets are available with shelves, doors, hanging rods, rollouts and drawers. When combined with field-installed accessories, a customized ensemble can be created. Browse through this specification guide for detailed information about the various styles and options available.

This system features a series of fully assembled wall and base cabinetry components.

Base cabinet components stand on the floor and act as a support for wall cabinet components, forming 84" tall towers. Typically, these towers are placed in the center of the wall run and feature drawers, doors, shelves and rollouts.

Hanging rod cabinets are then used to fill the remaining wall space, as these types of components are available in a wider variety of size options.

This system also features 72" high wall components with a series of drawer, shelf and rollout options. Use these wall components in place of towers where cabinetry cannot extend to the floor due to baseboards or obstructions.

All Base and Wall cabinetry ships fully assembled and ready to install.

Additional components such as rods, rails, panels and shelves can further customize storage necessities:

• Installation rails or pre-drilled shelving panels can be attached between two towers, or between a tower and wall
• Choose a combination of adjustable shelves and hanging rods to fit into the spaces between the two panels or rails

These components are field-modified and allow more flexibility for hanging rod and shelf locations.

Planning storage for an empty space can be a bit overwhelming—we offer so many options! Here is a three-step approach to help simplify tackling that empty space:

1) Identify how many “limited-width” components you will need. Components with drawers, shelves, rollouts and closed-door storage are available in a limited range of widths (15”, 18”, 21”, 24”, 27” and 30”). These are generally the core storage solutions for your space.

2) Begin your design by placing those core items into your layout first. They form towers that act as anchors for hanging storage or wall adjustable shelves.

3) Once those towers have been placed, it’s easy to complete your layout by filling the remaining wall space with a variety of wall hanging units, as these components are available in a wider array of sizes (15”-36” in ½” increments).

Look for additional Design Tips throughout this Specification Guide. They will help you create your layout and determine the best use of space in your project.
Wall Cabinets

Note: Wall cabinet components can be mounted directly to the wall, or placed on top of a 42” base cabinet to form a tower.

Pay special attention to the location of doorway headers when designing reach-in closets using cabinetry with doors.

Be sure to there is enough clearance for the cabinet door to open!

Our Base and Wall Corner cabinetry offer full access storage from floor to ceiling. When designing a wall-to-wall run of cabinetry using a corner cabinet at each end, be sure to incorporate a filler somewhere in the run to allow for variances in wall dimensions.

Take into consideration light switch locations. These are great areas to install 19" high or 34" high long-hang wall components!
Our wall hanging cabinets are sized in ½" increments for greater design flexibility. When planning sections of wall hanging, keep a more uniform appearance by dividing the hanging space with cabinetry components of equal width.

46 in. high Wall - Double Hanging Rod

- Two hanging rods for standard hanging
- Available in ½" widths from 15" - 36" wide
- Hanging space below upper rod is 37½"
- Hanging space from lower rod to floor is 38½"

46 in. high Wall - Single Hanging Rod

- Single hanging rod for standard hanging
- Three adjustable shelves
- Available in ½" widths from 15" - 36" wide
- Hanging space below rod to floor is 38½"
When planning storage solutions for both reach-in closets and walk-in closets, locate hanging cabinetry components toward the back end and outside corners of the spaces.

- Five adjustable shelves
- Attachment rail at top, middle and bottom. Due to weight, cabinets must be securely attached to wall studs in multiple locations per rail.
72 in. high Wall Cabinet - Shoe Shelves

When designing a rectangular shaped closet, maximize the usable space by ‘filling’ the shorter wall, and ‘shorting’ the longer wall. (Be sure to leave 12” of access space between cabinetry in corners.)

- Install at 12” above floor
- Seven adjustable shelves
- Position shelves 6.5” apart for shoe storage

72 in. high Wall Cabinet - 5 Slide-Out Shoe Shelves

- Install at 12" above floor
- Attachment rail at top, middle and bottom
- Three adjustable shelves
- Five re-locatable slide out shelves

When designing a closet-for-two; begin by dividing the space in half, and duplicating identical components in both sections to achieve equal storage for both parties. It will be easier to adjust individual storage percentages when the layout begins as 50/50.

72 in. high Wall Cabinet - Hanging - Slide-Out Shelves

- Install at 12" above floor
- Single hanging rod for standard or short hanging
- Five re-locatable slide out shelves
- Attachment rail at top, middle and bottom. Due to weight, cabinets must be securely attached to wall studs in multiple locations per rail.
72 in. high Wall Cabinet - 1 Drawer

- Install at 12" above floor
- Five adjustable shelves one fixed center shelf
- One 7½" drawer front with shallow 3¾" interior drawer box

Our units may be installed away from the wall on horizontal furring strips (purchased locally) mounted to studs. This option works great in spaces such as rental homes or apartments where baseboard moldings cannot be removed.

Pay special attention to the type of structural doors on a reach-in closet. Bypass and Bi-Fold closet doors require units with drawers/rollouts to be located differently to accommodate drawer extension.

72 in. high Wall Cabinet - 5 Drawer

- Install at 12" above floor
- Two adjustable shelves and one fixed center shelf
- Five 7½" drawer fronts with shallow 3¾" interior drawer boxes

Shelf Corner Connector
- Supports floating end of a shelf in 90 degree corners
- Attaches the floating end of a shelf to the face of a fixed shelf

Our hanging units work best when there is a minimum depth of 27" for reach in closets. Shelving units or TCR closet rods work better in a more shallow space.
